JUN 2 1 2006

CLAIM AMENDMENTS

Claim 1 (Previously Presented)

An actinic ray curable ink comprising a colorant, an epoxidized fatty acid ester or an epoxidized fatty acid glyceride and an oxetane compound,

wherein a viscosity of the ink at 23 °C is not more than 50 mPa·s.

Claim 2 (Cancelled)

Claim 3 (Original)

The actinic ray curable ink of claim 1, wherein the epoxidized fatty acid ester is epoxy methyl stearate, epoxy butyl stearate or epoxy octyl stearate.

Claim 4 (Original)

The actinic ray curable ink of claim 1, wherein the epoxidized fatty acid glyceride is a compound selected from the group consisting of epoxidized soybean oil, epoxidized castor oil and epoxidized safflower oil.

Claim 5 (Original)

The actinic ray curable ink of claim 1, wherein content of epoxidized fatty acid ester or epoxidized fatty acid glyceride is 10-80 weight % based on the total weight of the ink.

Claim 6 (Original)

The actinic ray curable ink of claim 5, wherein content of epoxidized fatty acid ester or epoxidized fatty acid glyceride is 10-50 weight % based on the total weight of the ink.

Claim 7 (Previously Presented)

The actinic ray curable ink of claim 1, wherein a ratio (A/B) of the epoxidized fatty acid ester or epoxidized fatty acid glycerides (A) to the oxetane compound (B) is 1/9 - 9/1 by weight.

Claim 8 (Previously Presented)

The actinic ray curable ink of claim 11, wherein the cation polymerization initiator is selected from the group consisting of diazonium salt, iodonium salt, sulfonium salt, an iron allene complex and an organic polyhalogenide compound.

Claim 9 (Cancelled)

Claim 10 (Original)

Printed matter wherein an image is formed by depositing the actinic ray curable ink of any one of claim 1 on a recording material.

Claim 11 (Previously Presented)

The actinic ray curable ink of claim 1, wherein the ink further comprises a cation polymerization initiator.

Claim 12 (Previously Presented)

The actinic ray curable ink of claim 1, wherein the oxetane compound is selected from the group consisting of 3-ethyl-3hydroxymethyl oxetane, 1,4-bis[(3-ethyl-3-oxetanyl) methoxymethyl] benzene, 3-ethyl-3-(phenoxymethyl) oxetane, di(1-3-ethyl-3-(2ethyl-3-oxetanyl) methyl ether and ethylhexyloxymethyl) oxetane.

Claim 13 (Previously Presented)

The actinic ray curable ink of claim 12, wherein the oxetane compound is selected from the group consisting of 3ethyl-3-hydroxymethyl oxetane, 3-ethyl-3-(phenoxymethyl) oxetane and di(1-ethyl-3-oxetanyl) methyl ether.

Claim 14 (Previously Presented)

An ink-jet image forming method comprising:

ejecting an ink through an ink jet head to recording materials, wherein the ink is an actinic ray curable ink of claim 1.

Claim 15 (New)

An actinic ray curable ink comprising:

a colorant;

a cation polymerization initiator;

an oxetane compound; and

an epoxidized fatty acid glyceride selected from the group consisting of epoxized soybean oil, epoxized caster oil, and epoxized safflower oil;

wherein a viscosity of the ink at 23°C is not more than 50 mPa·s.
